- Quiz
- Painting

PROJECTS

CryptoTracker. App | |

- Fetches real-time data from API endpoints, using React, React Router, Axios for frontend logic and API requests, Chart.js for graphical representation of data .
- Additionally, I integrated Framer Motion for animations and transitions, and enabled users to add cryptocurrencies to a watchlist for tracking.
- Skills Used : React, React Router, Axios, Framer Motion, Chart JS, Local Storage, API.

Financely. | |

- Financely is designed to help users manage their financial activities by tracking expenses, monitoring income, setting budgets, or analyzing spending patterns.
- Provides graphical representations and charts to offer users insightful data visualizations.
- The app uses "firebase" as a backend to handle user authentication and data security. Allows users to import financial data from external sources, also users can export their financial records for backup or analysis purposes.
- Skills Used: React, Firebase, Ant Design and Material-UI, CSV Parsing, Moment.js

MeShop. | |

- Users can browse, filter, add products to cart, and checkout with billing and shipping information.
- Incorporated API integration for product data retrieval, implemented ES6 features for efficient code, and added animations to enhance the user experience.
- Skills Used: HTML, CSS, JavaScript, API, ES6, Animation
