# Ahmeda Farhin

**Full Stack Developer**

Entry-level **Full Stack Web Developer** with proficiency in HTML5, CSS3, JavaScript, and a foundation in **React** and **Node.js**. Eager to leverage academic experience and hands-on projects to contribute towards compelling, collaborative teams.

## PROJECT DETAILS

**Crypto Tracker**
- Built real time dashboard using API of CoinGecko that provides insights for publicly available **1000+** Cryptocurrency prices and statistics.
- Implemented pagination using React to load modules in **< 1 millisecond**.
- Integrated framer motion for animations, transitions, and enabled users to add cryptocurrency into watch list by **1 click.**
- Facilitated react router and Axios to make the UI responsive and leveraged real time data rendering capability with **0 downtime**.
- Fostered an interactive UI to compare 2+ cryptocurrencies against price, market capitalization or total volume.
- Hosted the entire project into public internet using **Vercel**.

**Financely**
- Developed web-based tool to manage individual's monthly expense vs earnings, budget planning and spending patterns for 1+ years.
- Enabled charts to visually represent the 5+ key metrics.
- Engineered Firebase as backend service to authenticate user using SSO based login like Google.
- Added import/export feature for quick backup and analysis purposes.
- Promoted the app to public domain using **Netlify.**

## WORK EXPERIENCE
