WORK EXPERIENCE

Synechron
Frontend Software Developer   Nov' 2023 to Present

- ·Contributed to the development and deployment of Morgan Stanley's Wealth Management apps with **AngularJS**, **HTML5**, **CSS3**, and **TypeScript**, focusing on functionality enhancements, bug fixes, and UI/UX improvements, while also creating unit test cases for each component.
- ·Improved the UI/UX experience of a **Continuous Deployment System** App(CI/CD) by optimizing Angular methods such as lazy loading and memoization to reduce API call times.
- ·Developed a state-based validation system for each form in the **SSL Certificate Management App** using **Angular/TypeScript**, minimizing errors and boosting security.
- ·Boosted unit test coverage by 50% with Jasmine, fixed 397 code-smells, and optimized the SSL Certificate Management App.

Acciojob
Full-stack Development Trainee   Oct' 2022 to Oct'2023

- ·Completed training on Full-Stack development with deep focus on frontend development, gained experience building complex web apps using **JavaScript**, **React**, **HTML5**, **CSS3**, **Node.js**, **Express.js**, **MongoDB**.
  - **Projects Link**
  - **Frontend Certificate link**
  - **Full-Stack Certificate link.**
- ·Consistently ranked within top 10 among a batch of 200 based on DSA (Data Structures and Algorithm) based problem solving, project building and assignments.

OctaNet
Internship   Jun' 2023 to Jul'2023

- Enhanced user interface and optimization of web applications, including **HTML**, **CSS**, **JavaScript**, **React** and MUI framework.

EDUCATION

B. Ed	WBUTTEPA	Jul '17 – Jun '19
M. Sc (Batch Topper)	Aliah University	Aug '15 – Jul '17
B. Sc (Chemistry)	Aliah University	Apr '12 – Jul '15

SKILLS

JavaScript(ES6)	Express
TypeScript	Java
React Js	Firebase
Angular Js	Chart.js
Bootstrap	Framer Motion
Redux	Material-UI (MUI)
HTML5	MongoDB
CSS3	SQL
Git	

TOOLS

JIRA	Thunder Client
VS Code	TeamCity
Postman	SonarQube
MSQL Studio	Bitbucket

PROJECTS

CryptoTracker   **Live Link**

- Responsive app with React and Axios, featuring smooth animations with Framer Motion, consistent UI with Material-UI, real-time cryptocurrency data from CoinGecko, interactive visualizations with Chart.js, and deployed it on Vercel for public access. **GitHub Repo**

Financely   **Live Link**

- A web-based financial management tool with React, Firebase authentication, and interactive charts for tracking expenses and budgeting, hosted on Netlify. **GitHub Repo**

MeShop   **Live Link**

- Developed a shopping cart web app with HTML, CSS, and JavaScript, enabling product browsing, filtering, cart management, and checkout with billing and shipping details. **GitHub Repo**
